Annotation to scaled prices:

For orders of at least 10 (resp. 20) bits assorted, we charge the price of 10 (resp. the price of 20) for each bit. This corresponds to a price reduction of about 5 % (resp. 10%).

Assorting is possible separately for the bits (10 resp. 20 pieces), spurs (10 resp. 20 pairs) and for stirrups (2 resp. 4 pairs).

GOLDEN WINGS 4IN1

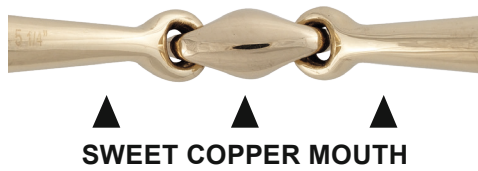

Scan this for more information!

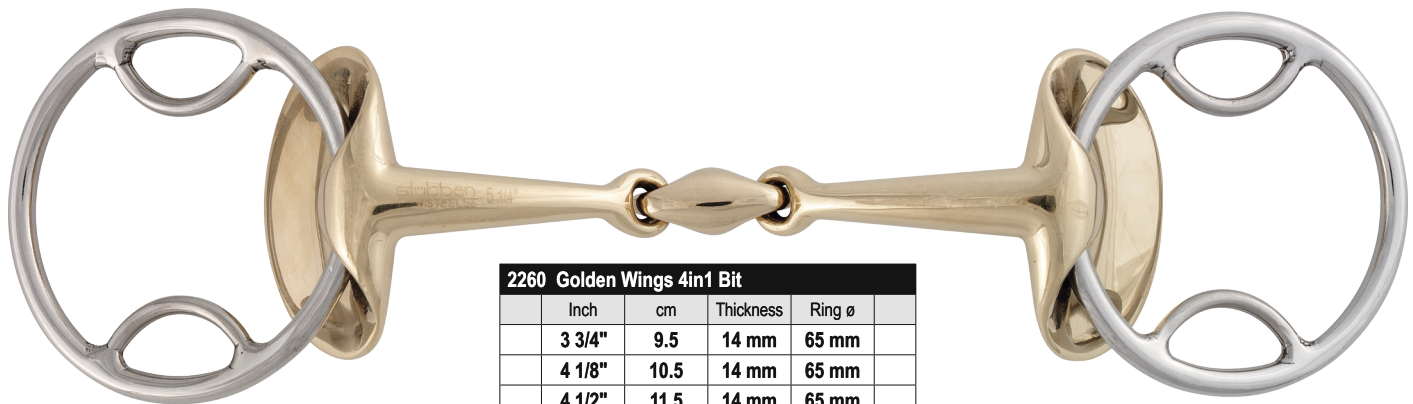

GOLDEN WINGS BITS

- Protects lips 100%
- No pinching, no nutcracker effect
- Lateral guidance across a large area
- Supports horse in turns
- Improves acceptance and leaning on the bit, particularly on the outer rein
- SWEET Copper is a solid and high-quality, nickel free alloy and consists of 89 % copper

GOLDEN WINGS 4IN1

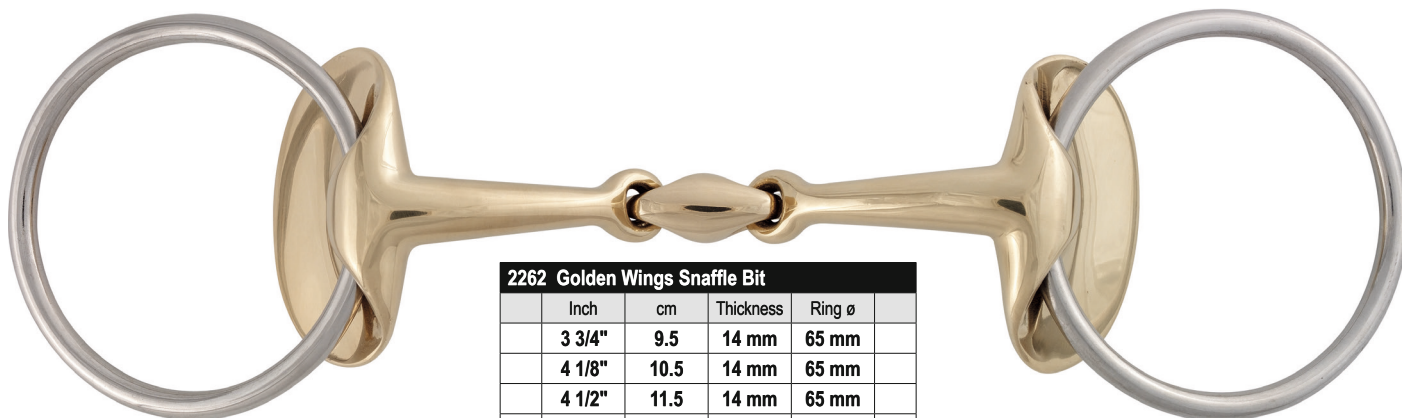

- Permits individual buckling (see pictures)
- Optimal pressure distribution over the horse's mouth
- When fixing the reins at the lower ring, the pressure is ideally divided between, and spread over, the horse's mouth and neck
- Golden Wings Bits combine the advantages of movable rings (loose ring snaffle) with optimal mouth friendliness and a well-directed and sensitive impact.

EASY CONTROL

Scan this for more information!

easy
CONTROL

EASY-CONTROL – MORE CONTROL, LESS PRESSURE!

- More effective impact with less pressure on the reins
- Allows easier communication between horse and rider
- Successful training aid with self-learning effect for the horse
- Especially effective against pull tendency
- Unique bit design – rigid effect with flexibility on both sides

RIGID EFFECT

SWEET COPPER LINK

The delicate sweet taste of the lozenge (Sweet Copper Link) encourages horses to salivate because their taste buds are situated in the centre of the tongue

Long durability is achieved by using stainless steel for all lateral mouth pieces

BUCEPHALUS – PRO HORSE BIT

The “Bucephalus pro horse bit” is a soft action loose ring snaffle bit. The reins are attached to the bit with two strong rubber bands within the O-rings. This creates a flexible connection between the rider's hand to the horse's mouth thus encouraging the connection from the hind leg into the rein. The pressure transmitted through the horse's mouth is reduced thereby promoting forward motion, rhythm and a softer contact. This naturally encourages elasticity in the horse's movement and willingness in the collection.
